Objective

To find a summer internship where I can expand my software development knowledge and learn from a high performance engineering team.

Skills

- Node.js
 - Express
 - React/Redux
 - Java
 - MongoDB
 - HTML5/CSS3
 - Git VCS
 - Bootstrap
-

Projects

YelpCamp

[Deployed](#)

Web application that allows users to submit and explore other campsites and comment on their experience.

- Used Google Maps API to take in an address, perform geocoding, and display the location of a campsite.
- Used passport to build an authentication system complete with signup, verification, login, logout, and password reset.

BattleHex

[Github Repo](#)

Online game where users purchase and play cards against each other.

- Implemented the Stripe Payment API to accept user credit cards to purchase merchandise.
 - Used React with Redux to reduce the number of required post requests when purchasing items to one.
-

EDUCATION

University of Mary Washington

B.S. - Major in Computer Science - 3.74
GPA

Graduating Spring 2020

Courses In

- Object Oriented Analysis and Design
- Data Structures and Algorithms

Extracurriculars

- ACM
 - Hackathon Coordinator
